## DETAILED ACTION

### ***Allowable Subject Matter***

Claims 1-8 and 11-14 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art known to the Examiner is listed on the PTO 892 and IDS forms of record. With respect to Claims 1-8 and 11-13, none of the references or combinations thereof anticipate or make obvious, *inter alia* a control section that controls convey processing of substrates by the substrate convey apparatus so that in a case in which after a substrate is continuously processed by two or more process chambers, the process is re-conveyed from the last process chamber to any of the two or more process chambers other than the last and return processing is implemented, and in the reconveyance the substrate is conveyed to said any of the process chambers after being temporarily retracted to a place other than a process chamber, wherein the place to which the substrate is retracted is adapted to accommodate a number of substrates, with the number of substrates being equal to the number of substrates that can be processed at one time by all of said process chambers, and wherein, in a case in which the substrate process time in each of said two or more process chambers is equal, taking  $n$  as the number of process chambers subject to return processing and  $T$  as substrate convey time between processing chambers, the retraction used by the control section is  $\{(n-1) * T\}$ , and wherein said conveyor chamber is centrally disposed relative to said process chambers. Moreover, the cited prior art does not anticipate or make obvious, *inter alia* temporarily retracting the substrate to a place other than a processing

chamber during re-conveyance of the substrate, wherein the place to which the substrate is retracted is adapted to accommodate a number of substrates, with the number of substrates being equal to the number of substrates that can be processed at one time by all of said processing chambers, and wherein, in a case in which the substrate process time in each of said two or more processing chambers is equal, taking  $n$  as the number of processing chambers subject to return processing and  $T$  as the substrate convey time between processing chambers, the retraction time used by the control section is  $\{(n-1) * T\}$ , and wherein said conveyor chamber is centrally disposed relative to said process chambers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
